Aaron Wylie P.Eng.

Aaron Wylie is a Professional Engineer and the current Superintendent of Mine Operations at Teck Highland Valley Copper. He graduated with a degree in Mining Engineering from the University of British Columbia in 2005. Over the course of his 19-year career, Aaron has gained extensive experience in mine engineering, operations, and management. For the past six years, his focus has been on automation. He served as Project Manager for Teck's first autonomous deployment of the Caterpillar AHS system and later held a corporate role as Automation Manager. In this capacity, he supported three active AHS deployments using both Caterpillar and Komatsu systems and contributed to regulatory revisions by the Ministry of Energy, Mines, and Petroleum Resources (MEMPR) concerning emerging technologies.
