Dr. John Jamieson

Dr. John Jamieson is an Associate Professor and Canada Research Chair in Marine Geology at Memorial University. He is originally from Edmonton, and received by B.Sc. from the University of Alberta in 2002, M.Sc. from the University of Maryland in 2005, and Ph.D. from the University of Ottawa in 2013. He then spent 2.5 years as a post-doc at GEOMAR Helmholtz Centre for Ocean Research in Kiel, Germany, before moving to Memorial University in St. John's, Newfoundland in 2016. Between degrees he worked for Cumberland Resources (Vancouver) for two years, exploring for gold in Nunavut and BC, and managed the Metallic Mineral Resources program at the Alberta Geological Survey for 2.5 years. John's current research focuses on submarine hydrothermal systems, ocean exploration, and deep-sea mineral resources. He has participated on over 20 research expeditions in all major ocean basins, and has spent over 2 years cumulative at sea. He is also the Chair of the Canadian Consortium for Ocean Drilling, the organization that manages Canada's participation in the International Ocean Drilling Program.
