Emily Cross

Emily Cross is a second-year master's student at the University of Victoria supervised by Dr. Victoria Arbour and Dr. Andy Fraass. Her master's research focuses on investigating the morphology of ankylosaur teeth. Emily has participated in paleontology fieldwork with the Royal BC Museum Paleontology Team in Northeastern BC and on Vancouver Island. She graduated with a Bachelor of Science in Geology from UBC in 2022. Emily worked at the Royal Tyrrell Museum of Palaeontology for 5 summers during her undergrad and in high school. She volunteers at the Royal BC Museum doing fossil preparation and collections management assistance. Additionally, Emily has been a long-time committee member of the Northwestern Ontario Regional Science Fair, mentoring elementary and high school students in STEM and working to make sure they have access to STEM opportunities. In her spare time, Emily enjoys hiking and curling.
