

EMLI Permitting Update

The update will cover the priorities and changes within the Ministry that relate to Notice of Work applications. It will also highlight some key information sources that can be used ensure your projects and applications are informed by the best available guidance. It will cover such things as updated mapping tools and standards, use of the reclamation bond calculator, where to find out which Indigenous Nations should be involved and what's required to address Covid-19 Public Health Orders. It will also go over important things to consider when working or applying for a permit in the South Central (Kamloops) Region.
