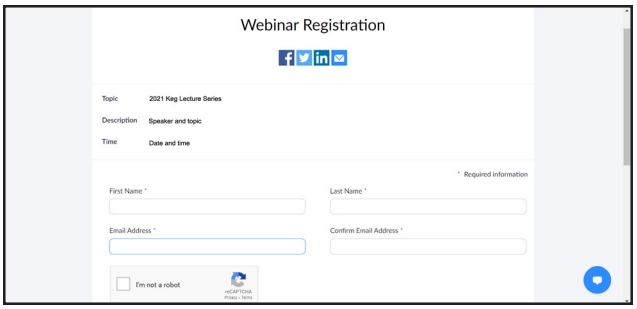
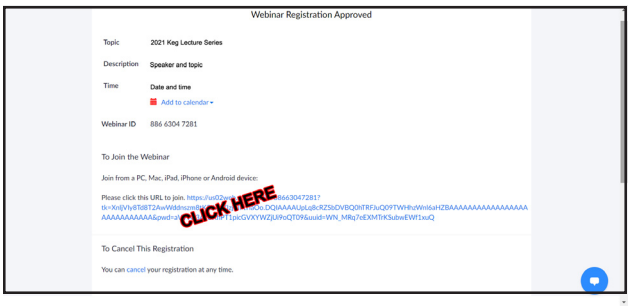
Zoom Helpful Hints

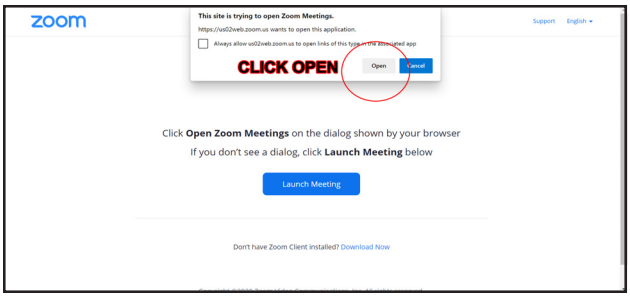
Once you have clicked the Zoom Webinar link to join the 2021 KEG Lecture Series, you will need to register.



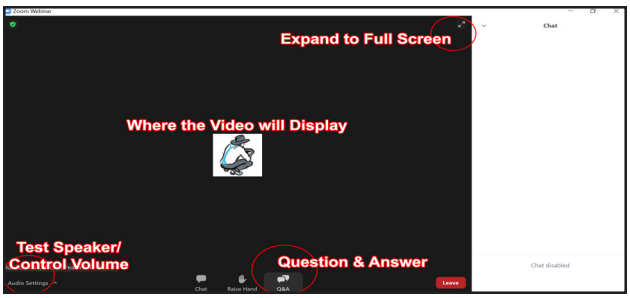
After your registration is approved, you will get a new link for the Zoom Webinar. Click the link.



It will then try to launch Zoom. You may need to click open or launch meeting. If it doesn't launch, you can choose "open in browser" which will appear below the launch meeting button.



If you can't hear the webinar, ensure your computer speakers are not muted and the volume is turned up. You can test your speakers using the audio settings which is at the bottom left corner of your screen.

To maximize your screen, in the top right corner you will find your full screen arrows.


At anytime during the lecture, you can click the Q&A box and type in a question. Your question may be answered during the lecture or at the end by the speaker either live or replied back in the Q&A box.
