## World Travelling Geologist - Oh, The Places You'll Go! – “Dr. Seuss”

---

Dr. Seuss must have been thinking about people choosing a career as an exploration geologist when he wrote this book. Working around the world as an exploration geologist I have studied many deposits, seen many cultures, and experienced several, let's say unusual situations that an exploration geologist may encounter. Also, a typical question people ask me is what your favorite place is you worked. I truly do not have one as each is unique.
