

Shaun Barker

Shaun Barker is the director of the Mineral Deposit Research Unit at the University of British Columbia. Shaun has expertise in geochemistry and structural geology, with broad experience in the generation and use of lithogeochemistry, mineral chemistry, stable isotope and mineralogical datasets in the study of hydrothermal systems. Shaun is leading the current AMIRA P1206 research project on the use of Resistate mineral chemistry in exploration for sediment-hosted copper deposits, and is currently initiating new research and training programs in his role as MDRU director.
